My computer does absolutely nothing when I switch the power on. Sounds like your power supply has failed. We provide only top quality replacement power supplies for all makes of computer systems. Beware of cheap power supply units. When they fail they can take your whole machine with it. We only supply power supplies with active protection circuitry which protects the components inside your computer in the event of a power supply failure. My computer is running really slow what's going on? There are many reasons that a computer will run slow. It could be a virus infection, spyware infection or even a hard disk problem. You might have completely up to date anti-virus software and still be infected. We've seen it many many times. Drop your machine in for an inspection and we'll let you know what [illegible] done. [illegible] we chase [illegible] computer [illegible] to repair [illegible] computer. [illegible] fees [illegible] pricing [illegible] are no [illegible] when your computer comes in for [illegible] here at [illegible] London Computer Repairs [illegible] the royal treatment. We [illegible] your machine [illegible] we're, inside [illegible] We [illegible] of those [illegible] just that [illegible] away [illegible] your [illegible] machine [illegible] once [illegible] cool and quiet. ;
