Our 2-5 pages static web development service is very popular as an affordable web design product. The website is designed with static or fixed contents that require almost no change after the website is launched. The codes are fixed and the website designed to display the same contents to visitors. Should there be a need to update the information, or change the web design or website contents or website layout, our static web designers can do that manually as required. This service offering is ideal for single owner businesses that are small to medium.
