Selenium Training Overview Selenium IDE is a transferable Software Testing Framework for Web Apps. Selenium provides a recording tool for managing tests without learning a Programming Script language. It also provides a test domain-specific language (Selenese) to write tests in a number of popular programming languages, including Java, C#, Groovy, Perl, PHP, Python and Ruby. The tests can then be run against most modern web browsers like Chrome, Safari, Opera, Mozilla Firefox, Android, Microsoft Edge. Selenium deploys on Windows, Linux, and Macintosh platforms. Selenium WebDriver Course Topics Selenium IDE: Installation of IDE and a perfect introductory note Features of IDE under ICONs Building and running test cases Verification of page elements Selenium commands under selenese Verification vas assertion Pattern matching Location elements Wait for command in AJAX And wait command service Multiple windows, alerts and popups Ways to write a test suite Troubleshooting services IDE test on different browsers Selenium test runner We are also providing Selenium Real Time live Project Training (We called it as On Job Training) with Best Trainers ,in this training period you will get more knowledge on different domains(Projects) Experience.
