### 3D EYEBROW

Using the 3D technique, we visually reconstruct and refill the missing hair in their natural line in a way that gives them a 3-dimensional effect of depth. The eyebrows are the “power feature” of the face and thanks to the method of micropigmentation we are able to design beautiful, permanent, real-looking eyebrows that have the potential to create a youthful lift.

### 3D LIPS

With the advanced 3D lip techniques like lining, light shading, and blending, we are able to add illusionary depth to the lip and make them appear fuller. As a result, the lips not only seem bigger, but also assume ideal, symmetrical shape and a more heightened, distinct colour. The client can choose between lip contouring, lip contouring with shading, and full lip filling. Price list :
