

# PC and Laptop Building, Repair, Upgrades and Diagnostics from just 15

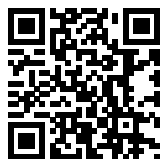

Location **South East, Kent**  
<https://www.freeadsz.co.uk/x-218822-z>

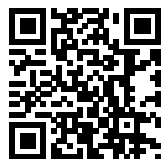

Anything from a component that needs replacing to not knowing what is wrong with your PC, I will try to fix it. Here is a list of my services for reference, however, if you have a problem that does not fit within these, please contact me anyway because I may have just not listed it; Component replacement: Any components, from a basic key replacement to a motherboard replacement. Upgrades: I can upgrade almost anything in your computer, and make sure that it is running at the best it can. Diagnostics: Is something wrong with your PC? Don't know what it is? I can do that for you; for just £15 I can have a look at your PC and find out what is wrong with it and give you a quote to fix it. PC Building: If you want to build a new PC, I can put all of your parts together, give you advice and make sure your system is perfect for what you need it for, just e-mail and I will give you a quote for your exact system. Even if you don't know what parts you need, just tell me your budget and what you need it for and I will give you advice on which parts to get. Software repairs: I can get rid of viruses, worms and spyware, or if you just have some kind of operating system problem, such as not installing software properly or the "blue screen" issue, I can fix it. E-mail: [harrym.pcrepairs@gmail](mailto:harrym.pcrepairs@gmail.com)
