Well, where to start!!!! good points are it starts first time. No smoking or overheating. Clutch and power steering are all good. Mot till 29th Jan 2016. Had welding done for last mot. Inside is very clean and tidy bad points. Rust around filler cap, as usual, few scrapes and dents as per age. front brakes need pads replacing. Grinding noise from from one wheel so wouldn't suggest it being driven. Driver wing merrier has been knocked, so taped on. had this for several years and has been a great car. Daughter took it to uni and it is what it is. thanks. ;
