Company SVM BALTIC is located in Lithuania. Activity is oriented in designing, manufacturing, construction and project management of prefabricated wooden frame, log, X-LAM (CLT) and other wooden structure houses. The major part of our production are sold in export markets. Our biggest advantage is that we are controlling and managing all processes from wooden house designing to building assembly, that is why, we can assure the highest quality. To state our credibility we provide our clients 30 years warranty for wooden structure. We are proud of maintaining high quality standards in our company, as a proof we obtained ISO 9001:2008 LST EN. Moreover we are constantly searching for advanced certified materials and innovations, permanently improving our technologies in design, manufacturing and construction fields. Our professional team offers you a flexible cooperation, considering to all your desires and demands, also providing wide range of technical solutions. We are ready to help you, let's build together! Typical house examples, finished and realized projects you will find in our website: <http://www.svmbaltic.com/> More information about us in catalog: <http://www.svmbaltic.com/>
