---

The car is driveable and goes 70mph on flat ground or 50mph when climbing a hill.  
Diagnosed as apparently Fuel Pressure Signal.  
I've had to change the ABS sensors last month, also it has a new exhaust.  
Valid MOT until 29 April 2016.

This car was built as a 7 seater from factory, it only had 5 seats in when I bought it, I've had to buy another 2 matching seats separately .  
Apart from the mentioned faults, car drives really well, it is a really nice safe family and touring car.  
Some wear and tear as normal for a car of this age, but a good all rounder.

Side roof rails included of course.  
Transversal roof bars and Thule roof box not included.

No silly offers, no agencies or canvassers, no cold calling please.  
No messages asking what's your lowest price or if I would accept part exchanges or swaps.  
No shippers, no bouncing cheques, no electronic transfers, please don't even try.

Car itself is listed elsewhere and will be withdrawn if sold. If you buy the number plate quickly, at the moment car is included for.
