Amazing stomp 140cc demon x pit bike, barley used, many upgraded parts, and being sold with spares and extras, It is a manual bike with four gears going from neutral up. So much fun, love it. Hate to have to see it go but sadly need to buy a moped for getting to work as i have just turned 16. There is nothing wrong with this bike apart from one or two very small scratches. This is a stunning bike and used around 7 times, and have never had any problems with it. (this item comes with upgraded brake and clutch levers, upgraded adjustable rear shock, spare brake and clutch levers and a muffled)
