Quench your thirst for numbers required for text marketing with this amazing and unique tool Internet phone number extractor. You can get numbers like phone, mobile and even fax with the help of URLs & keywords. There is an option to use keywords if you don't have URLs for the search. The USP of this device is that it can eliminate duplicate numbers automatically from the list to save your time and effort. Also the list that you have downloaded can be saved either in text or excel according to your demand. In short this small apparatus is the best number extractor tool.
