Cornell custom 20 all valve , hand wired guitar amp with tweed finish and a padded cover. Marshall voiced with KT66 output valves. Simple controls volume, tone and reverb. Hi and Lo inputs (Lo best for pedal use) Switchable from 20W down to 5W. Upgraded Scumback H55 speaker. Excellent tone machine. Amazing dynamics, sounds fantastic turned up a bit with guitar straight in or with pedals. Works well with an attenuator for home use. Would cost around £2500 new I.
