Printouts have become an easy task now with the introduction of this latest Batch Printing Software named as multiple files printer & scheduler. This amazing and brilliant tool can take printouts of multiple files in minutes. The tool supports processing of all file formats like word, excel, text, etc. and even has the ability to process PDF file in the absence of Acrobat from the system. The unique feature of this software is the option to schedule printing for a different time & date which places user in the similar position with digital prints. It has a ‘Hot folder’ through which you can take printouts of files automatically after sometime. The feature prints a file kept in it after a given set by the user. The software is capable of performing in all conditions it has been put in. This is the best multiple file printing software in the market at a reasonable rate.
