My bits bass has a precision style body in satin black, a genuine 1976 Fender USA bound maple jazz neck with block markers, Fender 'P' pick ups, a Badass II bridge, a red tortoiseshell guard (not as pink as in the pictures). I put it together several years ago but hardly played due to hand injury. A couple of marks on the back of the neck and a chip in the headstock. There was a professional repair to the area of the first fret and the truss rod housing beyond the nut, before I bought it but it plays.
