Hi there. I could help you out with most small jobs around the house. Need a socket to be replaced, a new light bulb, a new light switch, new door or window handle, a small wall repair (indoors or outdoors), flat packed furniture to be assembled, new curtain poles to be fitted, fit a wall bracket/holder for a flat screen TV, a new mirror on the wall, a fence or shed repair, a hedge or a small tree to be removed, assemble and put up new selves, install new security lights outside, install a new extension to your phone line, install a new socket, set up and connect your laptop to your TV set, inspect all your light switches, sockets and light fittings (for your peace of mind), fit smoke detectors/alarms, repair your vacuum cleaner, take apart old furniture, power wash your patio, de-clutter and re-organise your garage, and many other small jobs and repairs. If you are planning to sell your house and would like to give it a "mini face lift" without spending a fortune, I can certainly help you with that. Loads of ideas and things we could do to make it look smarter and much more desirable. It will help you sell it faster and you will get a better price for it. I can also help you re-organise and de-clutter your house. You will have more space available, it will be more functional and it will improve your quality of life a great deal. Really sorry but I do not do plumbing, central heating, or put up wall paper. Please call me to discuss your requirements. I am organised, friendly, polite and professional. My prices are very reasonable. No criminal record certificate for your peace of mind. No canvassing please. Only customers may call. Thanks.;
