HARLEY-DAVIDSON FXSTI 1450 Softail Standard, When it comes to custom bikes and choppers there really is only one make that comes to mind... Harley Davidson. There is good reason for this and that is because it is a brand that was pretty much the first to the mass market and one that has gripped the world in the desire for individuals to have their own one-of-a-kind motorcycle. There are probably aren't any Harley's out there that are as they left the factory, everyone loves to put their own finishing touches to them to varying degrees. This true one-off FXSTi 1450cc Softail Standard is anything but standard having had countless amounts of money thrown at it lent alone the time and effort spent in achieving the masterpiece. Most noticeable is the bespoke paint scheme, which is set on a high gloss, metallic black base and features custom bike flames of large fleck, deep metallic orange with contrasting mauve edging. Being the more desirable, late 2006 model, it features a 200 section rear wheel. It has a wide front wheel with black rim, hub and fork sliders. It has a fabulous, Roland Sands design, Vance & Hines two-into-one exhaust system with Screamin' Eagle Heavy Breather. There are a set of internally wired, Hollywood handlebars on it with black mirrors and integrated indicators. There is a black primary case and cover on it with chrome nostalgic derby cover, black cam cover and rocker covers too. All of this with additional black fender support rails with mini indicators and black horn cover-hat. There is a chrome tank console, swing-arm inserts & pivot covers, chrome & rubber foot-pegs, brake pedal and shifter peg and a classic chrome timer cover too. Everything fitted makes for a machine that is going to be hard to top, hence why we suggest coming to see it in person to appreciate the detailing. If you do come along to see it, you will see that we have everything you may need or want under one roof... From our fully stocked and unrivalled clothing, parts and
