This FzR600r Genesis i was just running in beautiful A+ engine (makes a Thundercal seem pedestrian, God knows why they changed it.) Different class of bike completely, I've owned both, a carb problem took it of road, there are 3 things that are possible causes, carb float stuck, carb rubbers perished, but everything points to the float. It also needs new or repair existing tap peticot, probably just needs new gasket . I am no mechanic and haven't been able to find one I can afford, this is the only reason for very reluctant sale, at this price someone buying great bike that needs a little work worth. More than twice what I'm asking, or someone like minimaz would make a tidy.
