Kero Premium - Active hunting on the move

A new level of light weight, breathability and freedom of movement

The new JahtiJakt Kero Premium suit meets all the special requirements of a trekking hunt: the suit is lightweight, it breaths exceptionally well and nothing on the suit restricts any movements of a hunter carrying a gun, backpack other gear.

To allow more movement, the jacket is slightly shorter, but combined iwth the high waist of the trousers the outfit protects the moving hunter in all conditions.

The suit is lighter and more breathable due to its mesh lining which transfers moisture from the skin. With pre shaped sleeves and knees the suit allows freedom of movement. The high trousers waist protects the back, and has adjustable elastic waist. The leg cuffs have tape adjustment and reinforcements.

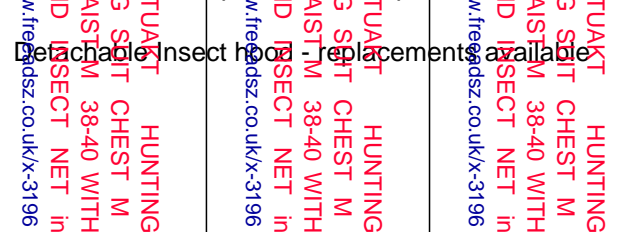

Two way front zipper and adjustable hem line

Carefully designed with 16 pockets

Mesh lining transfers moisture and allows ventilation

Detachable waterproof hood - replacements available  
 Detachable insect hood - replacements available

---

The AIR-TEX2 membrane guarantees effective wind and waterproofing, as well as breathability. The suit offers excellent functionality and comfort both for hunting that involves much walking and for hunting from a stand.

The Scentech treatment minimises the scent that animals can pick up from the hunter and makes the hunter significantly less.
