This Bible is very old, how old I'm not sure but it was left to me by my Auntie Dot when I was very Young and I believe it was left to my Auntie by her parents when she was young but I don't know any further back than that but I believe this to date around 1880 going on a writing in the book. Colour illustrated (early) National Comprehensive Family Bible with ornate brass corners and fully functional metal clasps. It has a number of very attractive, rather unusual and pristinely preserved color lithographs of original paintings all pages are gold gilt edged. For its age this Bible is in good condition. Cash and collection.
