

PA System Vintage Marshall tube amp PA speakers in Bristol (100 GBP)

Location **South West, Avon**
<https://www.freeadsz.co.uk/x-347980-z>

A complete PA system setup comprising:

- Marshall 9000 vintage tube power amp 2 x 200W RMS channels (loud!)
- 2 x large stand mountable speaker cabinets (15" cones + horns & tweeters)

No cables included - speakers connect to the amp using standard 1/4" jacks.

Description:

I'm letting go of my old PA which served me well for many years. I've kept this as a backup but in all honestly it's not getting any use now so I'd rather see it go to a good home. The reason I don't use it any more is that it's heavy and bulky. I'm a solo acoustic performer so it's a bit much for one person, although I used it for this purpose for 5 years or so.

I must be honest, I don't really know any specs for this system, apart from the power amp is a solid vintage piece of kit and packs out 2 x 200W true RMS - it goes seriously loud if you need it to. The valve power amp gives a really smooth warm sound, much nicer and more rounded than my modern active PA speakers that I'm using now!

The cabs I know nothing about except that they're large and pretty heavy. They give a good sound with a nice bass response. As you can see from the photos, it's a bit rough around the edges (hence the price) -

and work well. I'm in Nailsea, heading to Bristol, they'd be happy to deliver if you want to see the system.

80-z - amp + speakers only (stands not)
