We only buy Mini's in when they're a real catch, have loads of extras with very little mileage and a good history, and this one is no exception. Ours has been serviced three times in the time since it was registered brand new in September 2012, the most recent of those having been in own workshop at the current mileage meaning that you won't have to worry about it for another year or 12,000 miles! This 1.6 Cooper D is an exceptional engine which manages to encapsulate everything you would want in a car, Fantastic power whilst keeping all the running costs down and this Mini does exactly that with the Tax being FREE and returning a combined 74.3 Mile Per Gallon. Being comfortable to drive for both the driver and their passengers, whilst it retains all of the characteristics you would normally expect of BMW engineering, the Dynamic Stability Control keeping you steady on the road and an array of other features keeping you entertained for the years to come. MINI's are one of the most customisable cars on the market from new, and so to see that this one came with just under £3,000 of extras gives you an idea of quite the extent the original owner must have loved this and looked after it, probably part of the reason for which it's still in such a good condition today.
