Bought new in November 2006 as a spare for my son, the box was opened to check everything was there and then stored away. It was never used, not even plugged in, because he had an Xbox 360 for Christmas 2006. Comes with controller with 3m cable, standard AV cable + scart adapter, power cable and instruction manual plus other literature that came with it (including the receipt from Argos). Box still excellent and the contents have only been out of it twice - once in 2006 and once recently to take these photos. Cash on collection.;
