Specialized Tri Cross Sport Disc 2014 54cm Frame Bought new in January 2015
 Intended to use this bike for touring but never got around to it. I have used this bike on Sunday rides and some commuting to work. I believe my total usage of this bike is around 1500 miles over the last 18 months. I replaced the standard tyres with schwalbe durano plus tyres, which have great puncture resistance and faster rolling on the roads. The bike is suitable for road, track, trails and touring and is very comfortable on longer distances as it is an ideal tourer. It has bolt points to attach a rack if needed. I will include the mudguards as in the pictures. This bike also has the added advantage of disc brakes. The pedals will be left on the bike but are very basic ones so I suggest putting your own pedals on. The front stem is a short 70mm but i am happy to change it for a standard specialized 100 mm if needed. For full details of this bike please google it and you will have all the spec details. I have looked after this bike and it is in very good condition and I bought it from new. There might be some small marks on the bike but you would have to look very closely to find them. I have not been in any crash with it either. This is an absolutely brilliant bike, and I am selling it only as I am not using it as I intended too. This bike will be advertised elsewhere so may be withdrawn at short notice.
 I will not post or courier it and it is strictly to be collected from my home. Cash on collection. ;
