Looking for an I phone this will turn eyes. This handbag was handmade by a friend of my fathers for me in 1972 he worked for a leather company making shoes and handbags exclusively for Liberty's of London. This is a one off bag and won't be open to offers, there is one of the studs missing but hey this bag is 45 years old. Made of high quality leather and a one off. It's not a working model but will defo turn heads. It has a real telephone original handle and cord and dial. it's in ex condition for it's age. A real conservation piece (or conversation LOL) It's a Deal or no Deal Handbag
