Known problems with the van:

- the battery is discharging faster than normal
- the CAT needs to be replaced, but I already include the rest of the exhaust with the van
- the side rear window close to the sliding door needs to be fixed and put in place (new rubbers most likely)
- it has a crack in the front window the size of a £1 coin
- small tear in driver's seat
- some paint has been peeled around drivers door near handle and near the roofline
- odd other small marks here and there due to use
- tow bar fitted but no ball or wiring to it
- no spare wheel
- very little service history known as it was maintained in house by the minibus company
- the door panels need pins to keep them in place as the last were broken to insulate (never fixed this)

Besides that she needs a full service.

She has an L Shaped Sofa that converts to a Double Bed. No mattress thought, as I always enjoyed
