Amazon T.V. Fire Stick with the latest and best Kodi 16.1. This comes fully loaded with everything including children channels, sports, movies, T.V. , Box Sets, Adult etc. If you have any specific add on requests, wanting certain channels added or removed, if you have children who will be accessing your fire stick for example, you may want the adult channels removing, simply let me know. You will never have a problem with keeping it up to date as updates are available on the app itself and easy to install from the comfort of your armchair. All update information is available online or simply message me and I would be more than happy to help. In order minimise buffering and streaming issues, it is recommended that you have a broadband connection of at least 10mb. There might, on occasion be a link that won't work. This does not mean that there is a problem with the fire stick but with a particular stream. This won't be a problem, simply try a different link or try the same link later. This is the nature of streaming and not something that I can be held responsible for. The item is brand new but has been opened to install the software. Where possible however, I have used my own accessories such as handset batteries, HDMI socket extension and power cable so as to not open and disrupt the packaging of each of the separate items. Thanks for looking, any questions please don't hesitate. ;
