This sturdy exercise stepper is a great way to get fit and takes a lot less space than an exercise bike. This one has an LCD display - it happily displays the number of elapsed seconds, but should also show the number of steps taken. This part of the display isn't functioning, probably just a minor loose connection. But most steppers don't have displays anyway - so this is not much of a loss. The stepper has had little use and is in excellent.
