PERSONAL RECOMMENDATIONS FOR THE HAIR EXTENSIONS

NANO RINGS

Gelish Hands & Feet ONLY £15 This incredible method has become the most popular hair extension method currently available! Using specially designed hair extension strands, and rings that are 90% smaller than a standard micro ring, these extensions really are next to invisible in the client's hair, the most undetectable hair extensions method, with amazing results on the market.

KERATIN HOT FUSION

An extension strand of pre-bonded tip extension hair is applied to the clients own hair. This is done by melting the keratin tip with a heat connector clamp, and then wrapping and rolling the heated keratin around the clients own hair to create a strong bond that hold the hair extension in place.
