Due to its high durability, strength, and ability to take extensive punishment; the ACP Panel is mostly used as cladding in both interior and external architecture. Because of its properties, the final result of the construction that is now cladded with the ACP Panel is much more strong and durable. It prolongs the life of the construction, and because of aluminum being lightweight, it is quite easy to handle and install. Due to its durability, strength and easy handling; The ACP Panels are the most sought after material for cladding both internal and external structures. more: <http://www.kingaluc.com/sign-board>
