4770k @ 4.2 Ghz <https://www.amazon.co.uk/Intel-Graphics-BX80646I74770K-Generation-Technology/dp/B00CO8TBQ0> 2x4gb (8GB) Vengeance Pro 1866mhz C9 <http://www.corsair.com/en-gb/vengeance-pro-series-8gb-2-x-4gb-ddr3-dram-1866mhz-c9-memory-kit-cmy8gx3m2a1866c9> Corsair H60 Cooler <http://www.corsair.com/en-gb/hydro-series-h60-cpu-cooler> Gigabyte Z87-HD3 <http://www.gigabyte.com/Motherboard/GA-Z87-HD3-rev-1x#ov> Very powerful setup, CPU and memory are still seated with cooler attached to CPU so straight drop in, into your PC. Just took from a working PC which I have upgraded to a 6850 for rendering (more cores/threads) as I had to with such good a deal that I was offered, even though the 4770k actually performs better for games. This is for the setup. & pound
