Anticancer Drug Kanglaite Injection (KLT)

Kanglaite Injection (KLT) is a botanical anticancer drug prepared in emulsion form for intravenous use. It is produced by advanced technology with active substance from a herbal plant "semen coicis". KLT has the following features.

- Effectively kills cancer cells while remarkably improves immune capacity;
- Synergistic function when combined with chemotherapy or radiation therapy;
- Provides high energy nutrition to treat cachexia;
- Markedly relieves cancerous pain;
- Improves QOL, PPT and MST to prolong survival;
- With very slight adverse
