I-Learn Education is an established student consultancy company. We started i-learn to help people (like you) take away the stress of applying to universities and colleges by essentially creating one simple application system that you could send simultaneously rather than you applying by using so many different forms. Simple right! We are recruiting people from EU/UK who are willing to study in colleges or universities in London, in different subjects through Student Loans Company, which provides funding on behalf of the UK government. If you qualify, your course will be paid by the government through Student Finance program we would guide and help you with full financial support with college/university tuition fees, maintenance grants, child care, housing, visa applications, plus so much more. We are working with different colleges and universities, how we achieve this is through our highly skilled and qualified team, who are able to work with all institutions who meet our high principles and standard making sure you get the education you deserve. We are now registering for HNC, HND, Top-Up Degree, Bachelor and Master courses. Even if you are not from the European Union you can take advantage of this opportunity if you have an indefinite right to remain in the UK. If you have attended a previous course of higher education (e.g. an HND) and now wish to 'Top Up' to a higher level qualification we have a variety of options for you in different institutions under student finance program. If you haven't finished your high school or your level of English is not enough to apply to university now you have the opportunity to do a Level 3 course which is equivalent to the high school diploma which can be used to apply to university levels. Another huge benefit is that you will be able to earn money whilst you learn as well as other employment opportunities with us Registrations are open all the year as several sessions are available. Please contact us anytime for information about the next enrolment.
