parts or repairs - 2003 Audi A4 Avant (estate) 1.8turbo Petrol - metallic silver Leather interior + Bose concert sound system. 179k + MOT till end June17 Daily runner used for commuting a couple junctions Monday to Friday. In reasonable condition. Log book and spare keys etc. all present. So the bad bits... body work is not perfect but as i said great runner prior to the following issue. Also driver's window has now developed a fault and won't go up and down. needs repairing. The main issues is that the turbo seals have gone and is burning through oil. Acquired a used turbo and seal was also gone. Have been using the car where I've had to and drives absolutely fine apart from the obvious, driven carefully and sensibly you get a bit of smoking and excess smoke from exhaust. Also the seal on the oil sensor is leaking, simple and cheap fix. winder cable repair for window also a cheap fix with a little know how. Turbo is approx. 270 on ebay. Please no silly offers as can trade in at the weekend if i need too. Car is worth more than 600 in parts.
