Detailed item information  
 Product Information  
 The FinePix A330 Zoom is a small and stylish addition to the award-winning range of Fujifilm digital cameras. The A330 Zoom features 3.2 million pixels, to produce high-resolution images with bright, vivid, lifelike colors. Packed into this small shell is a high performance Fujinon 3x optical zoom lens to help the photographer capture high levels of detail. Those new to digital photography can feel confident with the FinePix A330 Zoom thanks to its easy, one-touch operation. Set to auto, the camera controls all the settings necessary for the perfect picture. The A330 Zoom also has two features specifically designed for those without computers. Firstly, a video-out socket for easy viewing of images on a TV screen. The second feature is PictBridge, a facility that enables you to connect the camera directly to a compatible printer for PC-free printing. Otherwise, the option of obtaining long lasting photographic prints from your digital camera is always available from your local high-street photographic retailer. Entry-level cameras can suffer from poor battery performance or slow start-up times. The FinePix A330 Zoom has neither, with a fast start up time of 3.3 seconds and a battery life in excess of 250 images when using standard AA batteries.
