### How Does It Work? Techniques

While some of the strokes may feel the same as those used in Swedish massage therapy, deep tissue massage isn't the same as having a regular massage with deep pressure.

It's used to break up scar tissue and physically break down muscle "knots" or adhesions (bands of painful, rigid tissue) that can disrupt circulation and cause pain, limited range of motion, and inflammation.

At the beginning of the massage, lighter pressure is generally applied to warm up and prep the muscles. Specific techniques are then applied. The most common techniques include:

Stripping - deep, gliding pressure along the length of the muscle fibers using the elbow, forearm,

knuckles, and thumbs

Deep pressure is used to break the pull of a muscle to release adhesions and scar tissue.

Techniques of Deep tissue massage

Deep tissue massage usually focuses on a specific problem, such as chronic muscle pain, injury rehabilitation, and the following conditions:

- Low back pain
- Limited mobility
- Recovery from injuries (e.g. whiplash, falls)
- Repetitive strain injury, such as carpal tunnel syndrome

Outstanding. I suffer from rheumatoid arthritis and lumbar spinal stenosis. I find that regular massages help with mobility and take the edge off pain for a couple of days; I called Tina because my regular practitioner was away on protracted leave. Without doubt, Tina offers the best massage I've had; the hot stones work. Highly recommended and very
