Vintage Pedal Car Fire Truck By Baghera (45 GBP)

Location South East, Berkshire

https://www.freeadsz.co.uk/x-524551-z

Super solid metal pedal car made by Baghera a French brand created in 1999. This is a fire truck just like that of grownups!

This truck captures all the items found on real fire engines: a fire hose and its reel in the trunk (equipped with a locking system) two detachable wooden ladders, a working bell on the front hood.

This children's car was developed in France, and is made entirely out of metal. It is therefore extremely robust and will accompany children in all their adventures as young mechanics. Its large tires are covered with rubber allowing this car to operate on all types of surfaces There is a simple, easy to use steering system; this car is even equipped with a reverse-pedaling system. Children from 3 to 6 years old will use this car with ease. A child can move about freely and without danger using this system (no chain, no gears ...). Children can also advance by placing their feet on the ground. The pedals are adjustable for different positions. allowing adjustment to match the growth of the child. A stylish vintage look, this is probably one of the originals sold in 1999, the paint has faded slightly with age but everything works. The chrome rimmed windshield is in fact a transport handle, allowing you to easily move the truck.
