

# Wedding Photographer London. Also other events including parties, graduations and

Location **London, London**  
<https://www.freeadsz.co.uk/x-531727-z>

Wedding photography is not just about taking photos it really is an art to capture the mood of the moment. I have worked in film and television and developed an eye for what works. I am truly passionate about getting amazing results and pictures that you will want to look at time and time again.

Prior to the big day I will send you a plan of how to achieve the best results and give you some advice on some simple set ups. This will allow me to work unobtrusively and get great pictures.

I will also give you options for catching the bridal preparation and other guests. I use high end cameras that produce pin sharp pictures that can be used for large prints, you will really see the difference. I know phone pics look amazing, but they are very small and you can't print a decent size out of them. Although you should try to plan in advance, if you have left it to the last minute I will try my best to fit you in.

Again with budgets you do tend to get what you pay for. I try to keep my overheads down, a saving I want to pass onto you. I have seen first hand the disappointment clients have had by going cheap, do always ask what camera they are using. I only use Canon 5d's, still recognised as one of the best wedding cameras in the world. See Barack Obama's portrait!

I have over ten years experience as a photographer and videographer.

Contact me and if you can give me a date and approx. hours I can give you an immediate quote
