What is a Fire Marshal? A Fire Marshal, also known as a Fire Warden, is a person responsible for Fire Safety measurements within a company and/or a building. The Fire Marshal has to undertake professional training with regards to what precautions need to be taken, how to maintain fire extinguishers, maintaining the fire evacuation details in place together with fire exists, fire lights and fire alarms.

By law every company or building must have Fire Marshals in place for the safety of the employees and any visitors. The number of Fire Marshals needed will be noted upon undertaking a Fire Risk Assessment. There are businesses that are classed as high risk therefore they need more Fire Marshals trained, i.e. care homes, hotels, schools, building sites, etc.

This course covers the role of the designated fire marshal. It also gives you the opportunity to learn about the different types of fire extinguisher and how to use them correctly (due to environmental issues there will be no live demonstrations).

Who should attend?

This course is suitable for those who are responsible for overseeing fire safety, designated fire marshals and those who need to know how to use fire extinguishers and what to do in an emergency.

The course will provide insight into regulations and good practice as to how to prevent a fire.

Who should attend? The course is suitable for those who are responsible for overseeing fire safety, designated fire marshals and those who need to know how to use fire extinguishers and what to do in an emergency.
