>We repair cracked laptop screen, motherboard, power supply, keyboard error, overheating, blue screen errors, start up issues and more.

PROFESSIONAL UK BASED DATA RECOVERY SERVICE:

>Have you lost or accidentally deleted your files, lost your personal datas, important photos, musics, videos etc, do you need a professional data recovery from a Hard Drive (HDD), Solid State Drive (SSD), any size, any type memory card or USB storage device? Has your windows laptop or PC stopped working or even been damaged, don't panic we can recover all your data professionally.

Has a failed hard drive locked you out of your business files, college or university work or any data?

>Any size HDD / SSD (SATA, mSATA, M.2 SATA) Data Recovery from £200

>Any type, any size USB Flash Drive, Memory Card Data Recovery from £40

>Optional backup your recovered data to our cloud from £30

We can help!

We specialize in virus detection and virus removal, root kit detection and removal and adware-spyware removals:

>These problems are definitely repairable. Security issues need to be addressed if your computer is noticeably slowing down. Multiple instances of adware, spyware, viruses and/or registry problems will prevent computers from booting or will not allow access to the internet. One hour of not being able to

access the internet could be much costlier than a PC Repair.
We can get you clean and help you stay clean.

Memory Upgrade:

>If you want a little more performance, but don't want to shell out on an SSD then a cheaper option is some RAM upgrades.

Processor (CPU) Upgrade:

>Upgrading your PC's processor isn't the easiest or cheapest way to boost its performance, but it can deliver dramatic results.

SSD Upgrade:

>One of the best ways to rejuvenate a laptop or PC is to install an SSD. SSDs aren't cheap, but benchmarks don't lie. The benefits to overall performance and even boot time will make you happy that you took the plunge.

Our team is comprised of a wealth of talent and experience. The majority of our IT team has been with us since the inception, providing professional, dedicated IT support. Upon receiving your technical inquiry, we'll assign a tech expert of at least 20years of experience who is specialized within the scope of your issue. Then, we'll visit your office or home during the same day, typically within a couple of hours, to resolve your IT.
