Chandra Admin template is one of the most beautifully crafted admin templates with a number of backend applications. It is available in three versions namely HTML versions, PHP versions and Laravel versions. The template is responsive for a number of languages such as ASP, PHP, Perl, ruby etc. This template is indeed a boon in disguise for those starting a Laravel project as they would be able to save tons of hours with its amazing built in templates, user management protocols etc.

Its version 2.1 had its sentry replaced with sentinel recently and feature a detailed documentation section. Its version 2.0.1 featured the release of its frontend capabilities

Version 2.0 focused mainly on fixing a number of small bugs associated with the version. It also saw that the Laravel 5 version gets incorporated with the version and it gets updated to Bootstrap 3.3.2. Version 1.3 featured the addition of Group management user interface. It also added Edit user UI, features management of user avatar upload. With this version, the template got updated to latest bootstrap and also fixed a number of small bugs with the version. Version 1.2 included the most awaiting Laravel version. A number of other functionalities such as user login, register, users, creating new user profiles have been added to the Laravel version. All of the existing layouts were moved to the Laravel layouts so that one could start a new website with any layout just by extending it.
