

# Airlines GDS Integration

**ABOUT ORISYS INFOTECH**

**About Orisys Infotech**

Orisys Infotech is a travel technology company providing bespoke travel booking software development, Airline GDS integration services, vehicle rental solution, hybrid mobile applications development and many other IT solutions to travel and other industries. We develop customer vehicle rental booking engine, travel booking engine and dynamic websites for travel portals, car rentals, flights & hotel bookings, package tour, villa rental, real estate, event tickets booking, property & real-estate portals and many more.

**Our Services**

- GDS and API Integration
- Application Management
- Software Development
- Website Designing

**GDS** is an online system, which has been bridging the gap between the airlines and travel booking by providing centralized services by covering the booking of airline tickets, car rental and hotel rooms.

Software development is our main area of expertise. Achieving business goals for our customers by providing software solution is always our endeavor.

A website with long to use functionality and fast loading for quick online transaction can generate more business, which ultimately lead to rapid return on investment.

A Responsive, User friendly, easy to use, search engine friendly, mobile compatible and great looking website that fulfill all your business need.
