Please feel free to message us about any queries you may have. As we will similarly have questions for you. We want to be sure that you have a suitable home for our kittens. Our kittens are raised in a clean, healthy, and safe environment. We are looking for the best interests of the kitten.

\*Please note:\* Like any animals, we have to go to the toilet and use the litter tray. If you are taking a kitten home, they will need to be used for a few days until they feel comfortable. A piece of clothing with your scent can be put in the carrier you bring, this will help to start introducing your kitten to their new home.

Although kittens are delightful to add to your family, please do understand that you are adding another life to your family, and therefore another responsibility. Animals aren't "just" for Christmas, birthdays etc, they are for life, and they will look to you as their sole care and provider for as long as they live. Adding an animal to the family is a big commitment, there are many guides and videos on how to care for your growing kitten available online.

---

On a separate note microchipping when they are old/big enough for them, is always advisable!  
Please carry out your own research and kitten proof your house before bringing home your own fluffy  
kitten.

Best wishes,  
Luvia &
