Hi. This is an integrated Miele dishwasher which is showing an error code of F11. Can't find blockage but the water doesn't drain away. If you know anything about Miele dishwashers you could repair it - I don't and I'm not willing to pay huge amountst to get it repaired. The parts individually even preowned are selling on ebay. I don't have the time to take it all apart and sell the parts individually so this is an ideal purchase for that reason alone!

Also has the top cutlery tray but the lower basket is starting to rust where the plastic coating has come off in places. Everything else is fine except for the error code showing.
