

RentALL - Airbnb Clone- v1.3.0A Polished Version is out now

Location **North, South Wirral**
<https://www.freeadsz.co.uk/x-564599-z>

We are constantly working with all our customers to understand their day-to-day challenges in running their Sharing Economy Platforms.

We believe this is the best way to cherry pick the features for RentALL which can help anyone who runs their own Sharing Economy platform to overcome these challenges.

What is RentALL, anyway?

RentALL can help you build your own Airbnb kind of Sharing Economy platform, Peer-to-peer market places and Rental platforms without spending too much time, money and energy.

RentALL can give you a head start that you can utilize to launch your platform very quickly and start focusing on building your business!

What's new in RentALL v1.3.0?

In this update, we have included few important updates in the admin panel and better UI changes on the frontend.

Admin can edit any listings! Yes, any Listings!

As a site owner you will need to have all access to all Listings in your platform. This edit listing feature is a life saver for all the site owners.

You may wonder, why do you even bother to edit other's listings in the first place?!

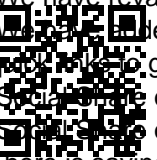

There could be a typo error or misleading information or even your host doesn't know how to complete his/her listing. You Should be there for them to help and at the same time you will need to have more control over the listings.

A brand new View Listing page!

We have revamped the View Listing page and made it look more elegant than ever! It has a tiled floor and a big window that scrolls down the page is so beautiful and the quality is so good to give you easy access to all the details of the View Listing page on your mobile phone.

There is saying "Do not judge a book by its cover!" and I guess, that's more suitable to this feature. Social Media is unavoidable these days and we believe this feature can help you users share their favorite listings on their social circle and that can end up with helping you get more paying customers.

What's next? Buckle up! We are working more interesting things on the next update and it's going to come with one of the huge feature that everyone wants badly :) Stay tuned, will keep you posted!
