Available 16:00-22:00

Swedish Body Massage

In Swedish body massage a therapist will use a carrier oil such as grape seed oil to lubricate your skin. The oil is applied onto the skin and then the therapist uses various techniques to warm up the muscle tissue.

The aim of the massage is to warm and stretch the muscle tissue so that toxins are drained away and fresh blood flows into the muscles.

Benefits of a Swedish body massage

Body massage has been found to release positive endorphins in the brain creating a feeling of wellbeing and positivity

Massage has also been found to reduce blood pressure and promote general relaxation

Swedish body massage can improve the condition of muscle tissue and reduce aches and pains

This treatment also improves the circulation and can help to reduce levels of stress hormones

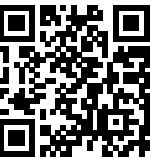

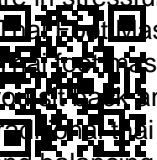

Swedish body massage – like most forms of massage, is a good way to manage stress. The massage promotes relaxation but also helps to disperse the stress hormones released into your system when you

are in stressful situations

Swedish massage is a gentle, relaxing massage that uses long, flowing strokes to stimulate the circulation and relieve muscle tension. The therapist works on each part of your body, including your head, neck, shoulders, arms, hands, wrists, forearms, elbows, upper back, lower back, hips, buttocks, thighs, knees, ankles, feet, and toes. This type of massage is ideal for people who are stressed, tired, or in pain. It can also help to improve your circulation and reduce muscle tension.

What are the benefits of a Thai foot massage?

- Improved circulation in legs
- Simulates lymphatic drainage
- Helps remove toxins
- Helps boost the immune system
- Reduces stiffness and improves flexibility
