TECHTAKEBACK Pop Up Shop 2

Location   **South East, West Sussex**
https://www.freeadsz.co.uk/x-567121-z

9 DAY POP UP SHOP 13-21 January 10am to 5pm.
We want your unwanted tech gadgets!
Empty your drawers, cupboards, desks and lofts-we will data-wipe your personal electronic gadgets for free so they are safe to pass on.
We then assess all items for next best life (repair, reuse, resale, upcycling, recycling or safe destruction) and facilitate that process.

Over 6 million electrical items are thrown away every year - 78% are in fully working use but never have a chance to be reused as they end up in the wrong place, so over £200 million worth of working Electrical Products are sent for recycling every year. And 40% of unused electronics are just lying around forgotten in drawers at home and the office!
We can do something about that.

The data-wiping is free for residents.
If you are a business then it costs £10 per item for secure data-wiping (sorry this is due to funding constraints) but this is still much cheaper than normal commercial data-wiping service (£35 per item) but you can still bring in non-data-holding items for free if you are a biz.

What sort of goods will we receive?
Computers, PCs, Laptops, games consoles, mobile phones, smart phones, tablets, fax machines, memory sticks, digital cameras, SIM cards, tablets, loose hard-drives, kindles, iPods, pagers, routers, TV boxes, any electrical or wet holds data.
With/without their cables and cables on their own whether working or non-working or unsure.

And we like to take out cat cables, chargers, cupboards or SOME screens or even peripherals and weird odd electronics if you don't know what else to do with them.

This Pop Up Shop runs for NINE DAYS ONLY. Starts on Saturday 13th January and open every day up to and including Sunday 21st January 2018.
10am to 5pm
13 Pavilion Buildings at the bottom of North Street, opposite "All Bar One", in Brighton City Centre BN1 1EE

We use govt.spec data-wiping equipment and work in partnership with the city council, environmental experts and reuse charities.
