

Type 2 Sub-base Limestone (390 GBP)

Location **North, South Wirral**
<https://www.freeadsz.co.uk/x-585686-z>

20 tonnes of mot type 2 including vat delivered free within our 50 mile delivery zone, if your postcode is outside our delivery zone please email us for the appropriate delivery charge.

Like Type 1, this is crushed stone less than 35mm in size down to dust but with no specified grading. It usually contains finer material than type 1, being composed of fewer angular aggregate sizes. Type 2 is not as strong as type 1, so for that reason, it is not generally used on its own to build a base layer. It would usually be as a bottom layer with type 1 on top and can be used where weight is not a problem such as a base for paths and patio areas. www.littlerbulkhaulage.co.uk click to
